Industry changing features

- Tested at 40% greater weight capacity – 360 lbs.
- No other residential product tested at this weight capacity
- Designed and engineered at Omega[™] Motion
- Our longest extension ever
- Close to wall in full recline
- EZ to operate by the entire household
- Manual or Power version available
- More layout in full recline than previous models

The new 360ez[™] series mechanisms give you the latest features your customers are looking for. From our extended layout to our improved linkage in high-stress areas, we've built in quality features unmatched by any other manufacturer in the industry.

Including:

- Close-to-wall proximity to accommodate any room configuration
- Effortless motion for EZ operation by all ages

WALL HUGGER® mechanism

manufactured by world famous Omega™ Motion

Effortless motion for full-recline comfort!

Improved Performance and Engineering

- Wide, heavy-gauge links designed for safety and appearance without pinch points
- Built-in, articulating, elevated mid-Ottoman to eliminate entrapment areas and improve leg support
- Geometrically balanced to allow the occupant's weight to balance operation instead of springs
- Smooth operating handle/lever unlocks the mechanism; occupant's weight opens the chair
- Square drive tube connects to and controls both left and right sides
- Mechanism base width is closer to seat width while maintaining sufficient clearance between links to eliminate possibility of interference
- Heavy flanges on links instead of tube eliminate problems with flexing and breaking of tube end at bend
- Large-diameter tubes maximize torsion strength, unlike non-tubular cross members and formed straps
- Delrin and bronze rivet bushings eliminate any steel-to-steel contact and reduce wear
- Nylon stop-pin bushings to reduce noise

Styling and Design

- All Omega™ and Delta™ series mechanisms are interchangeable in the same frame if the frame is constructed per the rocker frame prints
- Long Life™ mechanism has been field-tested and proven by L&P's testing facility
