

High-Leg Sofa Sleeper Mechanism

2500 Series High-Leg Sofa Sleeper System

- **Engineered low-profile linkage**
keeps all metal parts below the mattress line, while being the easiest to operate in the industry
- **All-round tubular frame construction**
provides a smooth and visually appealing look with improved safety (eliminated pinch points) and comfort in the seated position

High-Leg Sleeper

Styling and Design

- **Double-locking TV headrest** provides added comfort while lounging or watching TV by raising the upper body
- To reduce field failures, the headrest also restricts the unit from being cycled while in the "up" position
- **Contoured seat section** offers a wider seating area by allowing seating close to the arm
- **Forest black color**

Performance and Engineering

- **Body support tubes and wires** together enhance support in the body section to eliminate sagging. Body tubes keep the unit square and enhance unit strength
- **Pro-Deck™** two-ply ballistic decking material enhances durability and visual appeal
- **Optional seat-support wires** provide support while sleeping, plus adding durability to the overall unit. Support wires also give the quality feel of stationary seating
- **Dual one-piece round tubular legs** provide enhanced stability and strength, allowing the unit to be operated from the center or side position
- **Anti-Tilt:** a necessary safety feature, keeping the unit in contact with the floor at all times in the open position
