ENCASED COIL SEATING SYSTEM

PATENT NO. 6,367,881

Elite Series

### Premium Seating With "Drop-In" Manufacturing Ease

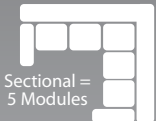

Using the proven performance of individually encased coils from the bedding industry, L&P product engineers reinvented the technology for application into premium furniture using a tempered wire 4" or 6" barrel coil and high density coil counts. The result? A seating system that standardizes installation and provides a seat of exceptional comfort and unmatched performance.

#### Styling & Design

- Adapts easily to any existing frame style
- Modular sizing allows one sku for many product types (sectional = 5 modules, sofa = 3 modules, loveseat = 2 modules, chair = 1 modules)
- Available in 4" or 6" coil height profiles

#### Performance & Engineering

- Automates seating installation to increase manufacturing productivity, decrease costs and eliminate quality inconsistencies
- Standardizes manufacturing to save you money
- Ultra high coil density (300 per standard sofa) means more working surface wire per seat allowing greater conformity to body contours
- Uniquely engineered inter-linked coil architecture provides uniform comfort and consistent support over the entire seating area
- The floating encased coil provides a feeling of "weightless" suspension - a perfect harmonic balance without adding stress to the seat frame

Sectional = 5 Modules

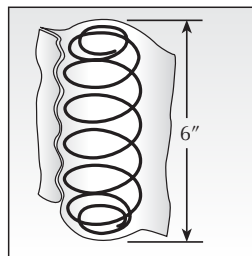

Sofa = 3 Modules

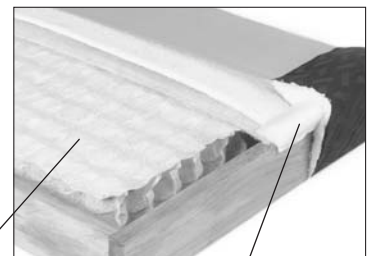

Love Seat = 2 Modules

Single = 1 Module

Noiseless - individually encased 4" or 6" Barrel-shaped coils compress inside the pocket without touching

Naturally insulated - cushioning materials won't "pocket"

Available In Hard or Soft Edge
